USE CASE DIAGRAM

Record of incidents that were
detected during project execution

Incidents

- Communication between two programming languages (PHP and Javascript).
- Learn PHP.
- Browsing between directories.
- Recursive functions in search, delete and move files features.

Record of lessons learned

Lessons

- Improve the knowledge of php.
- Send and receive information through promises (fetch in this case).
- How to get the information of a file with the variable `$_FILES`.
- Improve knowledge of recursive functions.
- Move files between different directories.
- Create a script to open different types of files on screen.
- Create folders.
- Rename files.
- Delete files and folders with all their content.
- How to move deleted files to a trash can.
- Use clickup and split tasks between the team.

Gracias.
